

CATIONIC COAGULANT SPECTRUM KL 4949

SPECTRUM KL 4949 has been manufactured as a Coagulant suitable for primary sedimentation, thickening and dewatering of primary sludge.

SPECTRUM KL 4949 is also suitable for colour removal from effluent containing dyes, colour etc.

Specification:

Form	:	Liquid
Colour	:	Clear Pale Yellow liquid
Ionic Character	:	Cationic
Solid Content	:	49 % to 52 %
Brookfield Viscosity (cps)	:	5000-9000
Charge Density	:	Very High
pH	:	4.0 – 6.0
Specific Gravity	:	1.113 @ 25 degree
Storage Temp.	:	0 to 35 degree C
Shelf Life	:	6 Months
Solubility in water	:	Completely soluble

Dosage

Mainly depends on the nature of the effluent. However, a concentration of 0.50 – 1.0 % active polymer is recommended for addition to the system.
